

4X4 PASSENGER CAB

CARRYALL

Do Your Best Work

You are a doer. Up before the birds and out after dark, because your hard work makes a difference to the people and places around you. Only Carryall is by your side every day, customized by need, tough by nature, and reliable by design. And now it's available with a new 4x4 cab specially designed to increase both comfort and productivity.

Club Car®

REDESIGNED FROM THE GROUND UP FOR COMFORT AND SAFETY

It's hard to be productive in an uncomfortable cab. Armed with that knowledge, we completely overhauled our 2- and 4-passenger 4x4 cabs for Carryall to provide greater overall comfort, enhanced safety, protection from the elements, and smart performance—so your team never has to slow down.

4x4 cabs available on Carryall 1500 2WD and 4WD models.

New OVERHEAD CONSOLE

Located above the driver, the new console puts all the vehicle controls (including fan, heater, and strobe light operation when applicable) in one convenient spot that's easy to access and adjust, even in transit.

40% MORE AIRFLOW

The cab's new tilt-out windshield with durable locking latches offers 40% more airflow for a much cooler ride. Plus, sliding windows in all doors and at the rear increase whole-cab ventilation.

EASIER ENTRY & EXIT

Front-hinged doors create 20% more space, making cab entry and exit easier for passengers (especially those wearing heavy gear).

FOPS NOW STANDARD

The cab roof is certified as a FOPS (Falling Object Protection Structure), a critical feature on industrial and construction job sites.

Optional accessories include: Front Work Lights, Side View Mirrors, Interior Dome Light, Interior Rear View Mirror, Windshield Washer and Heater Kit for Diesel Powered Vehicles.

BOOST YOUR PRODUCTIVITY

Talk with your Club Car Sales Representative to bring the new cab to your business.
